Tariff available at <https://www.marathonpipeline.com/Shippers/>

Exceptions to governing Rules and Regulations F.E.R.C. Tariff No. 316.18.0, and successive issues thereof:

Item 1. Definitions

“Crude Petroleum” means either the direct liquid products of oil wells, or a mixture of the direct liquid products of oil wells with the indirect liquid products of oil or gas wells including gasoline and liquefied petroleum gases, all of which are of merchantable quality when the API gravity is 50.9 degrees or less. Crude Petroleum will also include vacuum gas oil.

Note: All other definitions on governing Rules and Regulations tariff remain unchanged.

Item 12. Minimum Tender-Minimum Delivery

Tenders for the Transportation of Crude Petroleum for which the Carrier has facilities will be accepted into the System under this tariff as operations permit and, provided such Crude Petroleum is of similar quality and characteristics as is being transported from receipt point to destination point. Small batch sizes will be permitted by Carrier as operations allow.

Item 14. Measuring

All Crude Petroleum accepted by Carrier for Transportation shall be gauged or metered by a representative designated by the Carrier. The Shipper shall have the privilege of being present or represented at the gauging or metering. If tank tables are used, quantities will be computed from regularly compiled tank tables showing one hundred percent (100%) of the full capacity of the tanks.

Whenever there is substantial evidence of meter malfunctions in a custody transfer measurement, the parties involved in the custody transfer shall negotiate an appropriate adjustment on the basis of the most reliable and accurate information available.

Quantities for receiving, delivering, assessing charges and all other purposes will be corrected to a temperature of sixty degrees Fahrenheit (60°F).

Carrier shall account to each Shipper for one hundred percent (100%) of Crude Petroleum received for its account. Other Carriers participating in tariffs which make specific reference to this tariff may make adjustments for shortages in their pipeline systems. The authority and amount of any adjustment may be found in the rules and regulations of the participating Carriers.
