Non-GAAP Financial Measures

Adjusted EBITDA, distributable cash flow (DCF), consolidated debt to last twelve months adjusted EBITDA (leverage ratio), adjusted free cash flow (Adjusted FCF) and Adjusted FCF after distributions are non-GAAP financial measures provided in this presentation. Reconciliations to the nearest GAAP financial measures are included in the Appendix. These non-GAAP financial measures are not defined by GAAP and should not be considered in isolation or as an alternative to net income attributable to MPLX, net cash provided by operating activities or other financial measures prepared in accordance with GAAP. This presentation may contain certain EBITDA forecasts that were determined on an EBITDA-only basis. Accordingly, information related to the elements of net income, including tax and interest, are not available and, therefore, reconciliations of these forward-looking non-GAAP financial measures to the nearest GAAP financial measures have not been provided.
